

2018

Menu of prices, subject to availability, as follows:

Facility	Unit cost 2018¹ in EUR per hour	Associate charge per hour
ESR	1 241,80	1
UHF	1 241,80	1
VHF	1 241,80	1
Heating	1 241,80	1
Passive - per facility	248,40	0,20

The prices are inclusive of the same levels of assistance, and subject to the same conditions, as those afforded to members of the EISCAT Scientific Association, and cover help with experiment planning, preparation, and execution as well as help with analysis, and, if necessary, preparation for publication. User travel expenses, accommodation and subsistences are not included. Users are encouraged to be present during observations.

Instrument hosting, annual fee:

Facility	Per instrument cost 2018 in SEK per year
ESR	21 081
Mainland	11 650

EISCAT can host instruments, against a fee. The fee covers housing, electric power and Internet access, when required by the instrument setup and when such access is available at the location, plus some limited engineering and/or operational support on an 'as available' basis. More substantial support, charged on an hourly basis, may also be provided. The instrument owner would be responsible for the transport of the instrument from the country of origin and for the installation at the EISCAT location, including arranging potential permissions for the operation of the instrument (e. g. radio transmission license, etc.). Removal of the instrument after the end of the hosting period would also be the responsibility of the owner.

HAN

¹ From 2016, EC H2020 Unit Cost calculation according to the rules laid down in EC decision C(2013) 8199 final of 10.12.2013. Seeing the EISCAT infrastructure as one *installation*.
