

Ongoing projects

The EISCAT Kiruna antenna from an different angle. Photo by Craig Heinselmann

EISCAT Scientific Association coordinates and/or takes part in a number of projects with the overall aim to make [EISCAT3D](#) a reality. These projects are collected here.

EISCAT3D user portal

In the EGI Competence Centre the main focus is to develop a prototype user portal for EISCAT. We have implemented a [DIRAC](#) portal for existing EISCAT data.

[Instructions for accessing the prototype DIRAC portal are found in this document.](#)
